Incident Reporting

Create Incident Reports with Attached Media and Approvals

Increase Efficiency and Measure Department Performance

Incident Reporting

RESPOND, DOCUMENT, CAPTURE, REPORT, AND ANALYZE INCIDENTS

Respond to incidents, capture details, and author consistent and quality reports against a defined process. Define roles, job duties, and permissions to control approvals, assignments, and access to key information. Attach limitless media and evidence such as photographs, videos, and files. Ensure completeness, quality, and consistency of incident reports and ensure required processes are serviced. Instantly search, recall, report, and analyze incidents and related information.

IMPLEMENT YOUR PROCESS

- Customized Reports and Logs
- Define a Precise Response Process
- Implement Strict Access Controls
- Cross Department Collaboration

STRUCTURE AND CONTROL

- Enforce State and Federal Guidelines
- Review, Reject, and Approve Reports
- Configurable Notifications and Alerts
- Complete Audit Trail of All Activity

ANALYTICS AND REPORTING

- Create Charts and Graphs
- Schedule and Customize Reports
- Analyze Data for Trends
- Measure and Demonstrate Effectiveness

Incident Reporting Software is the foundation of what we do. Capable of countless configurations and workflow processes, CIP Reporting delivers an Incident Reporting platform that is second to none.
